depositor remains strictly confidential and shall not be publicly catalogued or otherwise disclosed to any third party. Submitters will be distributed only to the depositor or to third parties with the prior written agreement of the depositor. Submitters and any information concerning the biological material and its progeny may not be used in any way by the depositor, other than for the purposes of this agreement.

2.3 The biological material will be preserved by freeze-drying (10 ampoules) and cryopreservation (2 vials as backup). In case freeze-drying is not possible, the biological material will be preserved only by cryopreservation (10 vials).

2.4 The following quality control tests will be carried out by the depositor in the form of this contract:

- The virgin and parry shall be checked soon before and when preparing a new batch.
- Once a year the virality will be checked and reported to the depositor.
- The depositor agrees to receive a statement resulting from the yearly virality test.

2.5 The depositor will retain the authority of one of the samples from the batch of the biological material for long-term storage. If this culture does not correspond to the expected characteristics, a replacement culture may be sent by the depositor or the safe deposit contract may be cancelled (expenses for travel will be charged).
