DENR ADMINISTRATIVE ORDER
NO. 2024- 08

SUBJECT: NATIONAL LIST OF CLASSIFIED CAVES FOR CY 2012-2023

Pursuant to Republic Act No. 9072 otherwise known as the "*National Caves and Cave Management and Protection Act*", its Implementing Rules and Regulations as provided under DENR Administrative Order No. 2003-29, and in accordance with Section 4 of DENR Memorandum Circular No. 2007-04 "*Procedure in Cave Classification*" the National List of Classified Caves for CY 2012-2023 is hereby issued for the information and guidance of all concerned.

SECTION 1. Basic Policy. It is the policy of the State to protect, conserve and manage the caves and cave resources along with the surrounding landscape, as part of the country's natural wealth and heritage and to promote the right to a healthful and balanced ecology in accord with the rhythm and harmony of nature.

SECTION 2. Objective. This Order aims to provide guidance to the DENR and other concerned agencies and stakeholders responsible for the management of caves on the appropriate use of caves based on their classification. Cave classification is necessary to determine allowable activities inside the cave considering the biological, archaeological, historical, cultural, and socio-economic values of the cave.

SECTION 3. Scope and Coverage. This Order shall apply to all terrestrial caves in the Philippines.

SECTION 4. Definition of Terms. For the purposes of this Order, the following terms shall be defined as

4.1 Cave means any naturally occurring void, cavity, recess, or system of interconnected passages beneath the surface of the earth or within a cliff or ledge and which is large enough to permit an individual to enter, whether or not the entrance, located either in private or public land, is naturally formed or man-made. It shall include any natural pit, sinkhole or other feature which is an extension of the entrance. The term also includes cave resources therein, but not any vug, mine tunnel, aqueduct or other manmade excavation.

4.2 Cave Classification pertains to the entire process of assessing and determining appropriate sustainable use of caves with due consideration to biodiversity, archaeological, historical, cultural, and potential socio-economic values.

4.3 Class I caves refer to caves with delicate and fragile geological formations, threatened species, archaeological and paleontological values and extremely hazardous conditions. Allowable activities are limited to mapping, photography, educational and scientific purposes and closed for ecotourism activities.

Class I caves are further classified into.:

Class I-A	Caves with delicate and fragile geological formations/archaeological values/paleontological values;
Class I-B	Caves with threatened species;
Class I-C	Caves with extremely hazardous conditions (e.g. bad air, unstable ceiling, presence of rock fall/breakdown...etc);
Class I-D	Caves with delicate and fragile geological formations/archaeological values/paleontological values; threatened species; and extremely hazardous conditions ;
Class I-E	Caves with delicate and fragile geological formations/archaeological values/paleontological values, and threatened species;
Class I-F	Caves with delicate and fragile geological formations/archaeological values/paleontological values, and extremely hazardous conditions; and
Class I-G	Caves with threatened species, and extremely hazardous conditions.

4.4 Class II caves refer to caves with areas or portions which have hazardous conditions and contain sensitive geological, archaeological, cultural, historical and biological values or high quality ecosystems. It may be necessary to close sections of these caves seasonally or permanently. It is open to experienced cavers or guided educational tours/ visits.

4.5 Class III caves refer to caves with no known threatened species and archaeological, geological, natural history, cultural and historical values. It is safe to inexperienced visitors but should still be accompanied by cave guide/s. The caves may also be utilized, when appropriate, for other economic purposes such as guano extraction and edible bird's nest collection.

4.6 Terrestrial Caves refer to caves that are located inland and with passages that are not submerged in water.

SECTION 5. National List of Classified Caves. One-thousand seventy two (1,072) caves constitute the National List of Classified Caves from CY 2012-2023.

*Cave within protected area

¹The name in parentheses denotes the cave's old name. The renaming of these caves was endorsed by the Regional Cave Committee through a resolution.

²Based on the 2023 reassessment report, segments of Capisaan Cave are further classified into: Segments A&B: Class II; and Segments C, D&E: Class I-G.

SECTION 6. Additional List of Classified Caves. The classification of caves shall be a continuing process until all caves in the country have been classified. The DENR Secretary shall regularly issue an additional list of classified caves based on the results of assessments as provided under DENR Memorandum Circular no. 2007-04 Procedure in Cave Classification. The Additional List shall update the National List provided herein.

SECTION 7. Reclassification of Caves. Caves may be reclassified based on the results of a specific study/studies, experts' advice or upon reassessment after five (5) years. The proposed reclassification shall be recommended by the Regional Cave Committee (RCC)/Provincial Cave Committee (PCC) and the Protected Area Management Board (PAMB) for caves inside and within the periphery of the National Integrated Protected Area System sites, respectively; and approved by the Regional Executive Director concerned. The updated cave assessment report, at least Grade 3C cave map, and resolution from the RCC/PCC/PAMB shall be submitted to the Biodiversity Management Bureau (BMB). The BMB shall consolidate the list of reclassified caves to be included in the issuance of the Update to the National List of Classified Caves.

SECTION 8. Cave Management Plan Development. For caves outside of protected areas, a separate and sound Cave Management Plan shall be developed. For caves within protected areas, the Cave Management Plan shall be anchored on and integrated with the Protected Area Management Plan (PAMP). Cave Management Plans shall be developed with full community involvement and multi-stakeholder participation in the development and implementation. It shall include cave resource

management and utilization, protection measures and monitoring schemes, visitor management, mainstreaming climate change adaptation, disaster risk reduction, and business and financing mechanisms.

SECTION 9. Separability Clause. If any provision of this Order shall be held invalid or unconstitutional, the other portions or provisions hereof which are not affected shall continue in full force and effect.

SECTION 10. Repealing Clause. All Orders and other similar issuances inconsistent herewith are hereby revoked, amended, or modified accordingly.

SECTION 11. Effectivity Clause. This Order shall take effect fifteen (15) days after its publication in a newspaper of general circulation and upon acknowledgment of receipt of a copy thereof by the Office of the National Administration Registrar, University of the Philippines Law Center.

MARIA ANTONIA YULO LOYZAGA
Secretary
